SOUTHERN CALIFORNIA HORTICULTURAL SOCIETY
Where passionate gardeners meet to share knowledge and learn from each other.

July 2012 Newsletter

OUR NEXT MEETING
Thursday, July 12
7:30 pm
Friendship Auditorium
3021 Riverside Drive
Los Angeles
We meet the second Thursday of each month at 7:30 pm
It is free to SCHS members and $5 for non-members without a guest pass, which is found on the front of your member card.

Bring one or more plants, flowers, seeds or fruit to display at the Plant Forum and receive a free Exhibitor’s Ticket for the Opportunity Drawing.

JULY OPPORTUNITY DRAWING
Matilija Nursery of Moorpark will provide a selection of tempting California native plants for the Opportunity Drawing.
Also, SCHS members Matt-Dell Tufenkian of Dominus Plantarium and John Schoustra of Greenwood Daylily Gardens will be selling plants.

WELCOME NEW MEMBERS!
Gail Cottman
Guy Hernandez
Kathleen Irvine
Hannah Nendick-Mason
Suzanna Wood

NEXT SHARING SECRETS QUESTION
We want to know about the beautiful gardens in America, and beyond our borders, that you have admired.
The Sharing Secrets question for July is:
What is the most inspirational public or private garden you’ve ever visited?
You can answer on the cards we’ll supply at our July 12 meeting or e-mail your response to bushweit@yahoo.com by Friday, July 13.

Sam Watters:
Promoting Beautiful Gardens in America:
Frances Benjamin Johnston and Garden Photography in the US

Our July meeting of the Southern California Horticultural Society will feature author and historian, Sam Watters, discussing his new book, Gardens for a Beautiful America.

With hand colored slides not seen since the 1930s, this lecture presents the story of Frances Benjamin Johnston (1864-1952) who pioneered garden photography as gardeners embraced professional landscape architecture as a fine art necessary for a rich and civilized nation.

From California to New York, from Massachusetts to Virginia, Johnston photographed gardens from coast to coast and promoted a greener and more beautiful America through illustrated lantern slide presentation.

This talk is coordinated with the release of Gardens for a Beautiful America, 1895-1935, photographs by Frances Benjamin Johnston, written by Sam Watters and published by Acanthus Press in coordination with the Library of Congress that preserves the Johnston archive.

In May the library launched Watters’ on-line catalog of the Johnston slide collection, comprised of over 1100 of gardens, plants and garden-related images. The book features 250 selected slides from the collection and the full range of slides can be viewed at: loc.gov/pictures/collection/fbj/.

Sam Watters is an independent historian and author, educated at Yale University, University of Marseilles and at the Royal Herbarium at Kew, and has written numerous books and articles ranging from the gardens of the White House to cactus theft in the Mojave Desert. Readers of the Los Angeles Times will be familiar with his column, Lost LA.

JULY SELECTED BOOK
Gardens for a Beautiful America, 1895-1935, was written by our July speaker, Sam Watters, with photographs by Frances Benjamin Johnston.
A limited number of this recently-released book will be for sale at our meeting.
Published by Acanthus Press, in Collaboration with the Library of Congress; April 2012.
11 X 9.25 inches, 376 pages Clothbound, dust jacket 300 illustrations, including 250 plates
Member price: $63.00; List price: $79.00 acanthuspress.com/ps-70-2-gardens-for-a-beautiful-america.aspx

The July Meeting
June Meeting Recap

The June meeting of the Southern California Horticultural Society took place at the Los Angeles Zoo in Witherbee Auditorium. Long time SCHS member and celebrated garden designer, Chris Rosmini spoke about influential gardens she has seen and learned from.

While most of the gardens we were shown were English or European, the elements of design that made these harmonious landscapes are universal, and the basic principles could be translated to a drier, more Mediterranean climate such as ours.

The ideas and mechanics behind good design are often rooted in the past, and represent more formal, classical styles, which a modern designer adapts and adds to with a knowledge of plants and materials appropriate for one’s specific area.

Chris showed us some of her own designs as well, and clued us in to the workings of the creative process and the insights gained by study, travel and a love of gardens everywhere.

Chris is known for her use of textures and the creation of “tapestries” of plants and in her slides of gardens, particularly the English gardens created in the later half of the 20th century, the origins of that style were clearly shown.

She told us that, “No one does it better than the English.”

Of course, Chris makes these ideas completely her own by combining the wealth of plant material available to the gardener in Southern California in new and remarkable ways.

Kathy Musial was recognized for her many years of service to the board of SCHS as well as Pacific Horticulture as she steps down from both boards this year. There will be more about Kathy’s years of service in the near future – she won’t get away that easily!

Thank to Sandy Masuo, and the staff and volunteers at the Los Angeles Zoo, for making this change of venue possible. Thanks also to those tireless SCHS members who helped set-up, run and clean up after the meeting.

SHARING SECRETS

In June, we posed the question, “What is your favorite mail order source of plants (or bulbs) and why.” There is a clear favorite bulb source, as you will read.

I was introduced to Easy to Grow Bulbs when writing a newsletter article for photographer Gene Sasse, genesasse.com/stories_squill.htm.

Based in Southern California, Easy to Grow Bulbs stocks bulbs, achimenes through zephyranthes, and everything in between. Their website easytogrowbulbs.com is easy to navigate and loaded with full color pictures accompanying accurate text. Any questions? Call - You will be answered by a real person.

Order - Your shipment of fat and happy bulbs is rocketed over to you at a price that will satisfy all but the miserly.

Plant as directed - Easy to Grow Bulbs are appropriate to our climate. They make even a novice gardener look like an accomplished horticulturist for seasons to come.

- Lydia Plunk

Easy To Grow Bulbs has a giant selection for Southern California.

- Laura Bauer

SECRET CONTRIBUTORS

Morgan Seed.

Easytogrowbulbs.com.

Goodwin Creek Gardens, in Oregon. Unusual variety, lots of butterfly and hummingbird plants.

Add your response to this question on our Facebook page discussion board or on our MemberLodge website page.

RENEW YOUR MEMBERSHIP ONLINE

Most SCHS memberships expired on June 30 and we thank those of you have already renewed for another year. It is easier than ever to renew your SCHS membership through our website (socalhort.org) or go directly to the Member Lodge page (schs.memberlodge.org). Select “Membership” then “Member Application.” Fill out the application and pay with a credit card through PayPal.

We ask that you consider upgrading your membership level or making an additional donation. You can order gift memberships through Member Lodge, too.
We extend our deep sympathy to Takashi Hoshizaki and his family with the passing of our beloved member Barbara Joe Hoshizaki. She served as our Society’s president, was named the SCHS Horticulturist of the Year in 1982 and has continued to be an active member along with her husband, Takashi. We are reprinting her obituary to share highlights of her life with fellow SCHS members and friends.

Barbara Joe Hoshizaki, born June 14, 1928, in Oakland, CA, died at age 83, May 30, 2012 in Los Angeles, CA. Barbara attended public schools in Los Angeles and received her BS from the University of California, Los Angeles in 1951.

There she met Mildred Mathias, a botany professor, who became Barbara’s mentor and encouraged her to study ferns. Her MS was awarded by UCLA in 1954. Barbara was professor of biology and taught 28 years at Los Angeles City College. She was also Curator of Ferns at the UCLA Herbarium.

Barbara traveled widely. Early in her career she spent three months in Costa Rica studying ferns with the Organization for Tropical Studies. She continually worked with and developed close relationships with her academic colleagues and also with amateur and professional growers around the world.

She introduced many fern species into cultivation and wrote numerous scientific and popular papers on ferns. An avid taxonomist, she corrected scientific names of misidentified ferns through extensive research.

Barbara was president of the American Fern Society, the Southern California Horticultural Institute, the Los Angeles International Fern Society and vice-president of the Pacific Horticultural Foundation. She served on the boards of many horticultural and botanical organizations.

She was an honorary member of the American Fern Society, the Los Angeles International Fern Society, and the Tropical Fern and Exotic Plant Society, Inc.

She is well known for The Fern Grower’s Manual, published in 1975. This seminal work established a benchmark for ferns in cultivation in the United States. A revised and expanded second edition with co-author Robbin C. Moran of the NY Botanical Garden was published in 2001.

Barbara was an academic who didn’t confine her work to the herbarium; she was a gardener who actually grew the ferns she wrote about. Her garden, many years in the making, was her research library.

The hands-on experience informed her work and made her an in-demand speaker for professional meetings and for amateur groups. It was a fabulous garden that was both a pleasure and a privilege to visit. Barbara was a good friend who shared her knowledge, expertise, and plants from her garden. We will miss her generosity and kindness.

She is survived by her husband, Takashi, two children, Carol (George Brooks) and Jon (Madeleine Takii), a grandson, Daniel, a sister, Sylvia Louie, and a brother, Curtis Joe (Virginia Shing), and numerous nieces and nephews. Services will be private. Family requests that donations be made to the Organization for Tropical Studies, Box 90630, Duke University, Durham, NC 27708-0630, “OTS in Memory of Barbara Hoshizaki.”

OTHER PASSINGS OF NOTE

It is with sadness that we report the passing of two people who were connected with our Society.

Helaine Dunmire, May 25, the wife of SCHS 2001 Horticulturist of the Year and editor of Sunset Western Garden Book, Dick Dunmire.

Frances Ching, May 28, retired director of the Los Angeles County Arboretum.

PASSING OF BARBARA JOE HOSHIZAKI

We extend our deep sympathy to Takashi Hoshizaki and his family with the passing of our beloved member Barbara Joe Hoshizaki. She served as our Society’s president, was named the SCHS Horticulturist of the Year in 1982 and has continued to be an active member along with her husband, Takashi. NEW SCHS BOARD MEMBER
INTRODUCTION:
CAROL BORNSTEIN

Article and Photographs by Lisa Ceazan

SCHS offers a big welcome to our new board member, Carol Bornstein. Most everyone knows Carol, who has degrees in Botany and Horticulture, as the former Director of Horticulture and Director of Nursery and Horticulture Outreach at Santa Barbara Botanic Garden and co-author of California Native Plants for the Garden and Reimagining the California Lawn. Lucky for us, Carol now resides in Los Angeles and is the director of the new North Campus Gardens (NCG) at the Natural History Museum of Los Angeles County. We’re pleased to introduce Carol and the NCG in this month’s newsletter.

The NCG is a collection of discrete gardens with the unifying purpose of allowing Museum scientists to document biodiversity in the urban landscape. It is also intended to encourage the public to get their “nature eyes on,” to learn how to identify creatures they see in their own backyards.

The NCG started after renovations to the Museum building began a few years ago. The new Metro Expo Line stopping on Exposition Boulevard between the Museum and USC presented an opportunity to enhance the Museum’s north entrance, which was previously rather sterile and unwelcoming. Seizing upon the idea of taking science and education outdoors, the idea for the gardens was born.

The gardens were designed by Mia Lehrer and Associates in collaboration with Museum staff scientists. Installation began in 2011 and all the plants were selected to attract wildlife for scientific study and for visitors to observe (e.g., insects, birds, mammals, etc.).

Here is a list of the gardens on the North Campus:

**Transition Garden:** Demonstrates the history of agriculture and gardening in Los Angeles and is entered from the parking structure. It draws attention to the concept of “altered nature” within the urban environment.

**The Living Wall:** A visually stunning wall of made of vertically stacked argillite stone, this “rock garden” was designed to attract spiders, lizards and other creatures that seek out rock crevices.

**Urban Wilderness Garden:** Designed as a metaphor of the Los Angeles River, this area is planted primarily with California native plants. Consists of representations of headwaters, an arroyo and the city (symbolized by the carved stone seat walls and water feature).

**Shadow Garden:** Across from the Urban Wilderness, this wooded area will feature a wildlife viewing platform.

**1913 Garden:** One of two pollinator gardens. It is arranged by color and is situated next to the original and beautiful Beaux Arts style building. A second, unbuilt pollinator garden will eventually surround a new Butterfly Pavilion.

**Home Garden:** Includes edible plants that also attract pollinators. Jimmy Williams, renowned vegetable garden designer and recent SCHS speaker, planted and is currently maintaining this garden. Carol envisions other local edible garden designers contributing their expertise to the Home Garden through the seasons.

**The Strampitheater:** A popular destination for visitors and staff during the lunch hour, as it has become an outdoor extension of the café while their dining patio is under construction.
The official opening of the North Campus Gardens will be June, 2013. Limited programming is underway in the 1913 Garden and the Home Garden.

Page 5, top left, the Baccharis ‘Centennial’ in the 1913 Garden; bottom left, the entrance to the Home Garden; and, top right, the vegetable garden in the Home Garden.

SEEKING HEAD GARDENER AT THE NATURAL HISTORY MUSEUM

The Natural History Museum of Los Angeles County is seeking a Head Gardener for the North Campus Gardens. Reporting to the Director, North Campus Gardens, the Head Gardener leads a team responsible for maintenance of the living displays, insuring high-quality care using sustainable landscape practices.

This is a creative position which has the primary responsibility for all gardening activities, setting a welcoming tone for our visitors and providing service in the public areas of the Museum with a focus on the Museum’s mission and visitor experience.

Reclaimed largely from hardscape, the 3.5-acre North Campus Gardens were designed to create habitat for urban wildlife and to encourage visitors of all ages and interest levels to engage in and appreciate nature.

Through hands-on activities in the gardens and adjacent Nature Lab, visitors will be invited to assist museum scientists in studying and documenting wildlife in Los Angeles.

If interested, see the following link for more details: home.eease.com/recruit2/?id=1529541&t=1
UPCOMING SCHS PROGRAMS

August 9 – Matthew Levesque will discuss The Revolutionary Yardscape. Book sale and signing.

September 13 – CHANGE OF PROGRAM AND LOCATION:
Scott Kleinrock will tell us about The Huntington Ranch Project at the Huntington Botanical Gardens. At 4:30 pm, Scott will also host a tour of The Ranch. THIS TOUR AND MEETING WILL BE HELD AT THE HUNTINGTON BOTANICAL GARDENS.

October 11 – CHANGE OF PROGRAM:
Annual Award Banquet honoring Dick Turner as our 2012 SCHS Horticulturist of the Year. He recently retired as longtime editor of Pacific Horticulture magazine and we are changing the date to match his schedule. The dinner and silent auction will be held at the Huntington Botanical Gardens.

December 13 – Annual Members’ Night (aka, Cookie Night). We will also have a DVD showing of No Work Gardening by Ruth Stouts.

2013 PROGRAMS

January 10 – To be announced.

February 14 – Andrew Bunting, curator of Scott Arboretum at Swarthmore College in Philadelphia since 1993 and president of Magnolia Society International will speak.
